

Energy Inspection Services

Your One Stop Shop For Integrated Field Services

EIS provides professional, integrated field services generating quality, flexibility, and cost savings for your heavy industry projects. We are a single provider for complex services ranging from certified and objective site inspection to land permitting.

Organizations that choose EIS are better able to stay on schedule and within budget because we understand our role in your success.

Our clients are better able to deliver higher quality projects with increased integrity and fewer surprises. This is directly attributed to our role in providing an objective perspective in the pursuit of quality, safety, compliance and continuous improvement.

EIS provides our customers peace of mind. This stems from strategically partnering on a foundation of trust, shared accountability, and shared knowledge to provide best practices beyond industry standards time after time.
