

Environmental Services

Your One Stop Shop For Environmental And Regulatory Services

EIS Environmental's Team of scientists and other specialists handle your projects with determination and care. Our Team has extensive experience in environmental compliance, regulatory permitting, and land work primarily focused in the oil and gas industry. EIS Environmental understands the governing rules and regulations associated with developing and permitting projects across public, tribal, and fee lands. We have worked with a multitude of state, federal, county, and tribal agencies.

Our Team's personnel has experience in working for companies who are regulated by governing agencies, as well as working as a regulator for agencies. Our varied backgrounds and experience gives us a unique perspective into industry from both ends of the spectrum. This perspective provides for a great advantage in producing proven results. We align with your company's goals within the critical regulatory framework to achieve project success.

Because we are part of the larger EIS organization, we have the ability to work together to comprehend the 10,000 foot view and full life-cycle of any project. From inception to completion, EIS Environmental's comprehensive cadre of services is delivered with the focus and care you deserve.

We Work Together With EIS Geographic Information Services

The EIS Environmental and Geographic Information Systems teams work seamlessly to complete your projects. We work as a smaller cohesive group to provide Geographic Information Systems (GIS) and Global Positioning System (GPS)-based services that are driven by our clients objectives. Please see the EIS Geographic Information Services information piece for additional information.

*We see opportunity in
challenge; find solutions
for problems; and create
balance for our clients
and the natural world.*

What We Do

Regulatory and Environmental Permitting

EIS completes and manages submittals while interacting professionally with regulatory authorities to accomplish client objectives, interests, and budgetary targets.
