Environmental and Regulatory Services

(Please reference our separate brochure for more information)

The EIS Environmental Team has extensive experience in environmental compliance, regulatory permitting, and land work. We understand the governing rules and regulations associated with developing and permitting projects across public, tribal, and fee lands. We have worked with a multitude of state, federal, county, and tribal agencies.

- Regulatory and Environmental Permitting
- Biological and Ecological Services
- Environmental Compliance
- Land and Right of Way Services

Geographic Information Services

(Please reference our separate brochure for more information)

The EIS Geographic Information Services Team has extensive experience in providing GIS and GPS expertise to the oil and gas industry. We tailor your systems to identify problems, monitor change, manage and respond to events, perform forecasting, set priorities, and understand trends. Our key focus is to ensure that GIS functionality aligns with your organization's unique needs and priorities, delivering the best possible value.

- Design, create, implement, manage, or modify your GIS
- Generate or gather needed GIS data
- Convert or merge GIS data
- Evaluate and cleanse GIS data

Our Professional Commitment

Compliance, Regulation, and Safety

EIS brings integrity to your projects, providing safe environments for all involved — your team and ours. Safety inspectors, OSHA Compliance, Leak Detection and Repair, and Line Locating are just a few of the areas of focus to assure quality and control.

Experts in the Field

EIS provides quality experts specific to your industry and objectives. All team members have met pre-employment qualifications and testing in order to join our valued team. In addition to our own core requirements and standards of excellence, EIS assures specialized and required industry certifications, including:

- AWS Certified Welding Inspector
- NACE Certified Coating Inspector
- API Certified Tank Inspector (653)
- API Certified Piping Inspector (570)
- API Certified Pressure Vessel Inspector (510)
- Journeyman Electrician
- Specifications for region as required
- Chief Inspector
- Assistant Chief Inspector

We Work For Our Team So They Work For You

A common word used by our team members is “family.” We take care of each other in the field, in the office, and in our daily lives. Our commitment to our employees includes 100% paid insurance, 7 paid holidays, one week of paid PTO per year, 401K, FRC Reimbursement, and more. We are dedicated to their continuing education and growth — making our team stronger and powering our ability to deliver to our customers. More information can be found in provided inserts or with Human Resources.
